History of Smith & Wesson®

Smith & Wesson® was founded by two men who shared a dream of developing a new type of firearm... one capable of being fired repeatedly without the annoyance of having to reload with loose powder, ball and primer. The story began with the Smith & Wesson Arms Company founded in Norwich, Connecticut in 1852. Due to financial difficulties, Horace Smith and D. B. Wesson sold their majority interest to Oliver Winchester in 1854. Using the original Smith & Wesson patents Winchester's new venture emerged in 1866 as the Winchester Repeating Arms Company.

Horace Smith returned to his hometown of Springfield, Massachusetts, and D. B. Wesson continued to work for Winchester. Wesson had designed a small revolver that fired a cartridge that he and Horace Smith patented in 1854. Both men believed this new revolver had the potential to create a successful venture, and they re-formed their partnership to begin production of the revolver in Springfield, Massachusetts in 1856.

This new rimfire cartridge has become one of the most famous cartridges ever developed. Originally called the "Number One Cartridge", today it is known as the .22 rimfire.

The demand for Smith & Wesson® products accelerated in 1861 with the advent of the Civil War. Wartime production firmly established Smith & Wesson® as one of the leading firearm manufacturers in the United States.

By 1867 the partners were experimenting with a new design, the Model 3, but lacked the necessary market. In April 1867, they authorized Henry W. Hallor to negotiate contracts and establish a market in Europe. A Smith & Wesson® arms exhibit, organized by Hallor in Paris, was extremely popular. Russian Grand Duke Alexis was so impressed with Smith & Wesson® revolvers that he purchased several. This opened a worldwide market for Smith & Wesson®.

The "top break" Model 3 was a totally new design. In May 1871 the Russian government signed a contract for 20,000 Model 3s, paying Smith & Wesson® in advance in gold. The Model 3 became popular throughout the world and extremely so on the American western frontier.

Smith & Wesson® expanded the line by introducing the first group of "double action" revolvers in 1880. In 1899, one of its most famous revolvers ever was introduced, the .38 Military & Police, the predecessor of today's Model 10. This revolver was designed to fire another first, the .38 Smith & Wesson® Special® cartridge.

In 1908 the N frame (large size) line of revolvers, chambered in a new cartridge called the .44 S&W Special®, were introduced. This line of handguns would become legendary in the hands of such famous handgunners as Elmer Keith and Ed McGivern.

During the 1930's, the "K-22 Outdoorsman™", for the competitive shooter, and the ".357 Magnum™", for the law enforcement officer who needed a powerful handgun, was introduced. The 1935 introduction of the .357 Magnum® was significant as the beginning of the Magnum® era of handguns.

In 1949 the company moved to a totally new and much larger facility in Springfield, Massachusetts. Here, in 1955, it introduced the first American made 9mm double action pistol, the Model 39. The same year a revolver and cartridge which have become legend around the world - the Model 29, .44 Magnum® was unveiled.

The introduction of the Smith & Wesson® Model 60 in 1965 launched the era of the stainless steel handgun.

In 1965 Smith & Wesson® began a series of ownership changes that ended when Saf-T-Hammer™ Corp. of Scottsdale, Arizona purchased Smith & Wesson® and returned ownership to an American company.

1852

Horace Smith and Daniel B. Wesson form their first partnership which resulted in the magazine pistol, also nicknamed as the "Volcanic".

1854

D.B. Wesson and Horace Smith patent a new rimfire cartridge

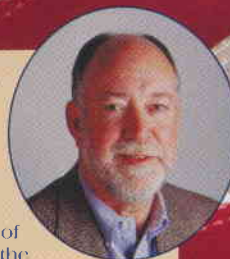

During 1971 a new fifteen shot 9mm auto-loading pistol called the Model 59 was introduced. In 1979 the very successful Smith & Wesson® L frame line of .357 Magnums, the Model 581, 586, 681 and 686 was introduced.

A new line of pistols called Third Generation models was introduced in 1988. Two years later a new Third Generation model, the 4006, and a new caliber, the .40S&W were introduced and became an immediate success with law enforcement. A polymer frame pistol, the Sigma Series®, was launched in 1994. The introduction of the SW99 pistol, collaboration between Carl Walther of Germany and Smith & Wesson® began production in 1999.

The language and lexicon of firearms has been forever influenced by the innovations of Smith & Wesson. Calibers such as .22 Rimfire, .38 S&W Special®, .44 S&W Special®, .357 Magnum®, .44 Magnum®, .41 Magnum® and more recently the .40 S&W are familiar to firearm and non-firearm owners.

Knowledgeable firearm enthusiasts instantly recognize Smith & Wesson® names like Schofield, Magnum®, Chiefs Special®, Centennial®, Bodyguard®, Combat Magnum®, Combat Masterpiece®, Kit Gun®, Airweight®, AirLite® and LadySmith®. This year marks 150 years since our founders began the journey that has made Smith & Wesson® the leading innovator in handgun development.

It is a great honor to be president of Smith & Wesson®, a company with a heritage and tradition known world wide. A company also known for its innovation, quality, value and reliability. For 150 years Smith & Wesson® has been part of the battle to keep peace and protect freedom, at home and around the world. Our story moves ever forward as each generation builds on the efforts and accomplishments of the previous ones. Those of us here today are part of the heritage of the past and the promise of the future.

Smith & Wesson® has been a brand name for 150 years and is at the top of any list of immediately identifiable corporate logos recognized worldwide. May 14, 2001 Saf-T-Hammer™ Corporation of Scottsdale, Arizona purchased Smith & Wesson® and returned ownership of this great company to America. I am proud to be part of the plan and I look forward to adding to the history and heritage of an American Tradition.

Rollin E. White

1856

Smith & Wesson® form their second partnership in Springfield, MA.

Smith & Wesson® obtained patent rights from Rollin White for the exclusive use of the bored through cylinder.

1858

Model 1 First Issue revolver, chambered for the .22 rimfire cartridge, originally called the "Number One Cartridge: but today it is known as the .22 rimfire short, is introduced.

1859

John Brown raids Harpers Ferry.

New for 2002

Innovation has been the hallmark of Smith & Wesson® since its inception. Through the years the ever evolving Smith & Wesson product line has witnessed the introduction of new frame sizes, new calibers, new metals and a host of other features to meet the needs and requests of handgun users.

For 2002 Smith & Wesson offers several models featuring HIVIZ® front sights. These range from small frame revolvers for law enforcement back-up and large frame hunting revolvers to 9mm and .40S&W pistols for personal protection and law enforcement applications. The light gathering feature of the HIVIZ® sights make sight acquisition fast when speed and precision are important.

Model 340PD

1861

Smith & Wesson® introduces a larger frame called the "Model 2" that fires a .32 rimfire cartridge.

1861

The U.S. Civil War Begins.

1862

The Civil War demand for Smith & Wesson's® handguns exceeds factory capacity, so the order books are closed until the heavy backlog is filled.

New for 2002

A new scandium frame Model 360PD with the ever popular red ramp front sight is also an addition to this year's product line. For those that desire to shoot the venerable .45ACP cartridge in a revolver there is a new option for 2002 from Smith & Wesson®. A four inch barrel stainless steel Model 625 that uses full moon clips for speed and ease of loading will have special appeal to competitors in the revolver sports.

Model 910

Saf-T-Trigger™

The Saf-T-Trigger is a mechanical trigger block, which is permanently installed in the trigger guard of a handgun or shotgun. The block is activated quickly and simply with a special key, which raises a post into position behind the trigger, physically blocking the rearward movement of the trigger. With the Saf-T-Trigger™ activated, the firearm cannot be fired.

Saf-T-Hammer™ is a gun safety company focused on preventing unauthorized gun use and unintentional firearm accidents. Saf-T-Hammer™ has a broad customer base including sporting goods distributors, law enforcement distributors, law enforcement retailers, law enforcement agencies and gunsmiths.

VersaVault

The VersaVault is a personal security vault offering the highest possible electronic and mechanical security with thick cast aluminum and steel construction. The VersaVault is the ideal handgun storage option allowing near immediate access to a handgun. It features an owner programmable and user-friendly lighted keypad with four keys with more than 10,000 available combinations.

The vault is designed for both vertical and horizontal installation, includes a steel mounting plate, has a tamper alert, low battery alert, and easy access for electronic backup and internal lighting.

Its small 10-inch x 14-inch x 3.5-inch external dimensions provides maximum space utilization and allows the VersaVault to be installed nearly anywhere. It has a unique internal holster that presents the firearm to the owner for maximum speed and accessibility. This holster is also removable, providing additional storage capacity depending upon the owners needs.

Maximum Security Cable

The new Maximum Security Cable is "Shockproof" and will not open when subjected to jarring. Its heavier steel cable is cut resistant and extensive independent testing has proven the product to be up to 10 times stronger than conventional cable locks.

1867

1862

1865

1867

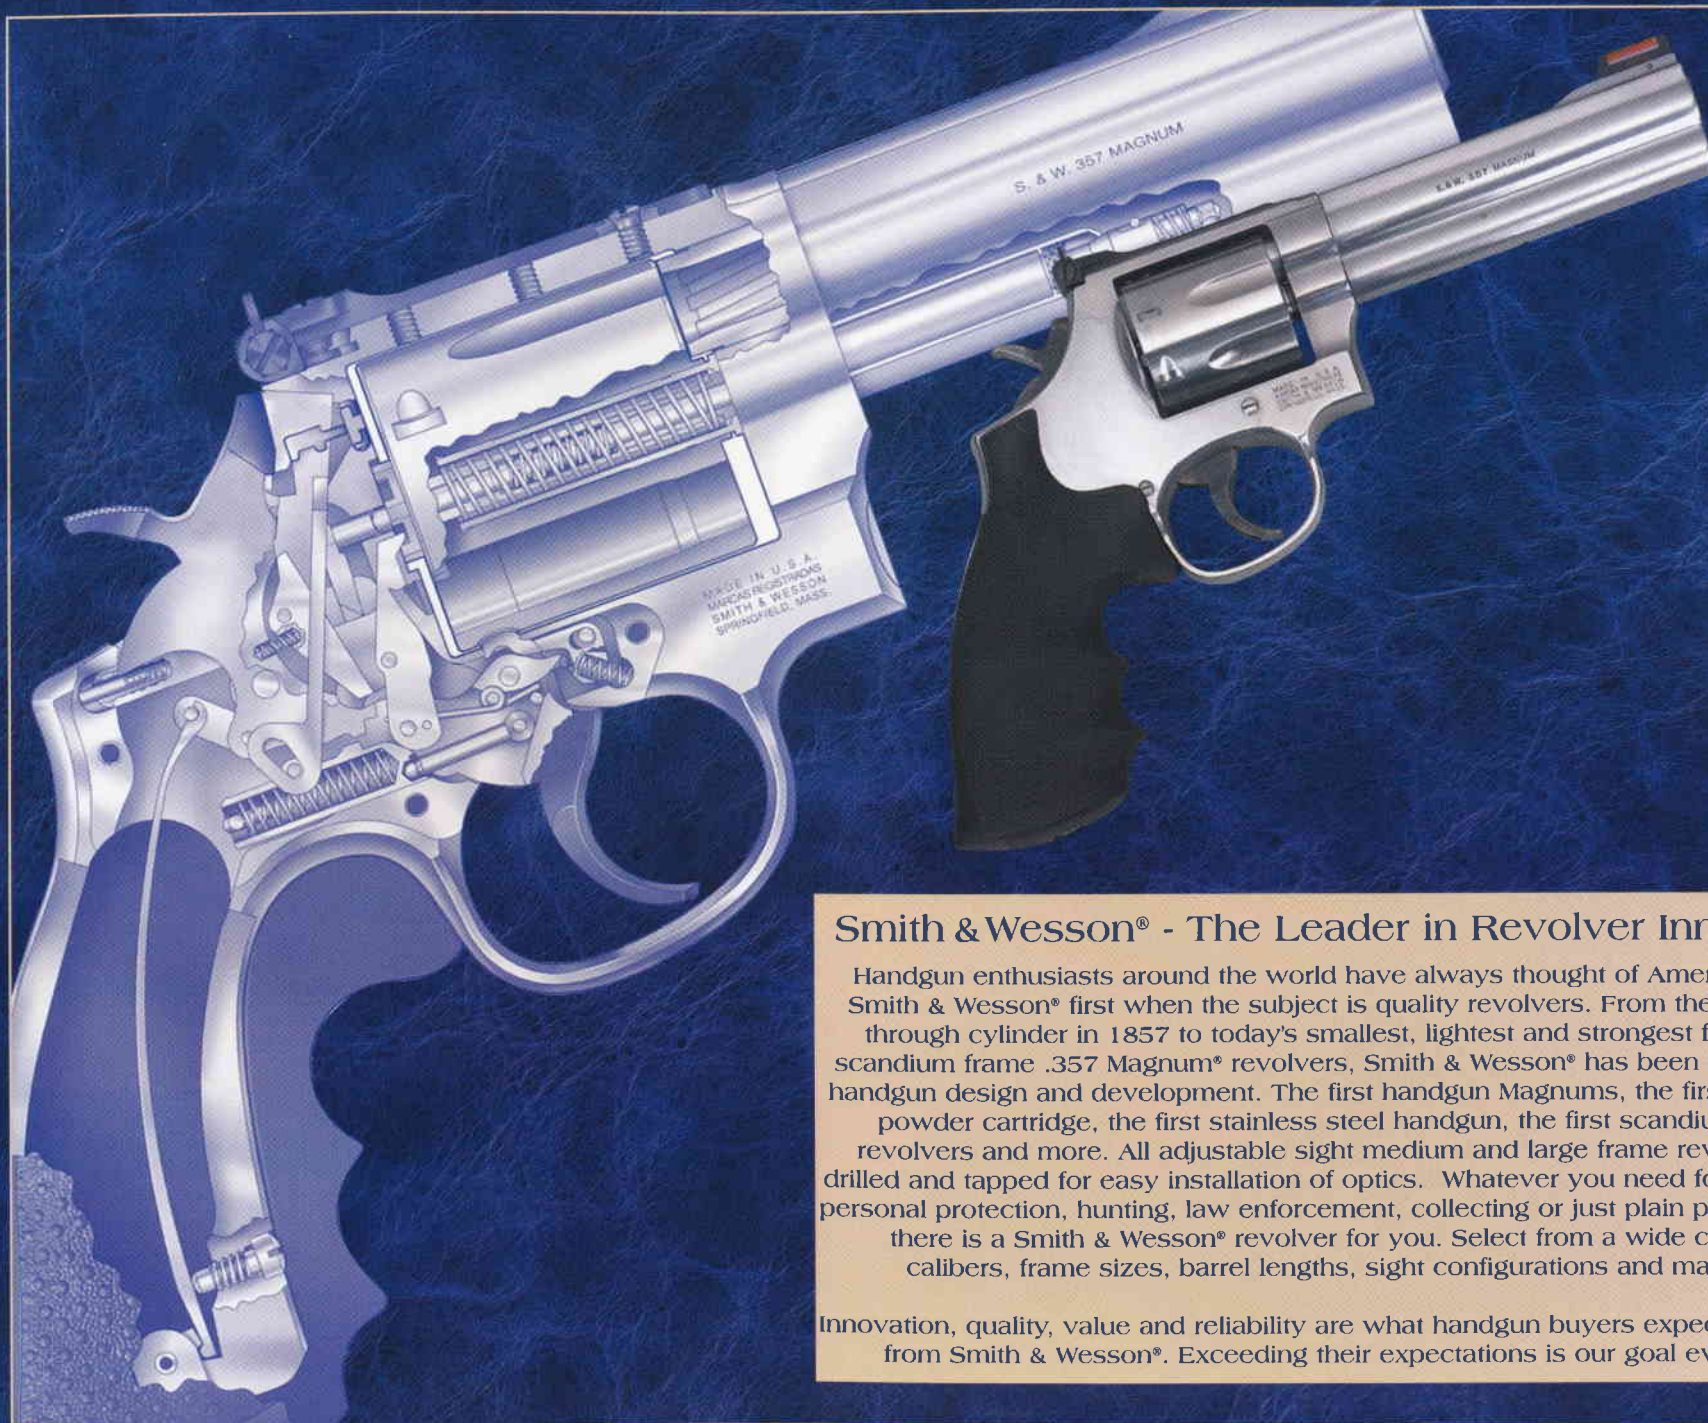

Several major Civil War battles: Battle of Shiloh, Second Battle of Bull Run, and Battle of Antietam.

General Lee surrenders to Grant at Appomattox; the Civil War is over.

Smith & Wesson® authorize Henry W. Hallot to negotiate contracts and establish a market in Europe.

Dominion of Canada is established.

U.S. buys Alaska from Russia for \$7.2 million.

Smith & Wesson® - The Leader in Revolver Innovation

Handgun enthusiasts around the world have always thought of American made Smith & Wesson® first when the subject is quality revolvers. From the first bored through cylinder in 1857 to today's smallest, lightest and strongest full feature scandium frame .357 Magnum® revolvers, Smith & Wesson® has been the leader in handgun design and development. The first handgun Magnums, the first smokeless powder cartridge, the first stainless steel handgun, the first scandium frame revolvers and more. All adjustable sight medium and large frame revolvers are drilled and tapped for easy installation of optics. Whatever you need for a handgun: personal protection, hunting, law enforcement, collecting or just plain plinking for fun there is a Smith & Wesson® revolver for you. Select from a wide choice of calibers, frame sizes, barrel lengths, sight configurations and materials.

Innovation, quality, value and reliability are what handgun buyers expect and receive from Smith & Wesson®. Exceeding their expectations is our goal every day.

The Smith & Wesson® Chiefs Special® Airweight® was introduced in 1952 and was designed for the law enforcement officer that was required to carry a firearm regularly. The original Airweight® was designed with both an aluminum frame and cylinder. The most popular Airweight® models today feature aluminum frames with cylinders and barrels of stainless steel.

Smith & Wesson® Safety Tip

Always safely store and secure your firearm.

Safe and secure storage of your firearm is one of the most important responsibilities of firearm ownership. It is a full-time responsibility. You must always secure your firearm and ammunition separately so that they are not accessible to children or other unauthorized persons.

1887

1883

Brooklyn Bridge and Metropolitan Opera House in New York are completed.

1885

World's first skyscraper is built in Chicago.

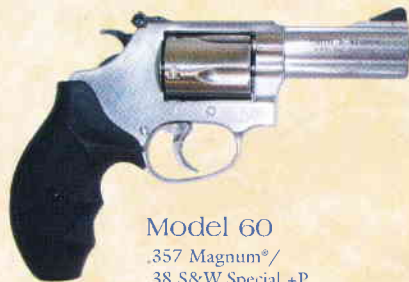

The first of the .38 Safety Hammerless revolvers is produced.

1888

George Eastman's box camera (the Kodak) is produced.

 Small frame .357 Magnum®
 revolvers that deliver the weather
 resistance, low maintenance and
 added recoil control of an all
 stainless steel handgun.

Model 649
 .357 Magnum*/
 .38 S&W Special +P
 SKU: 163210

In 1965 Smith & Wesson® introduced the Model 60, a stainless steel version of the Chiefs Special® revolver. It was the first stainless steel handgun produced by any manufacturer and launched the era of stainless steel handguns so popular today. First shown at the Conference of the International Chiefs of Police that fall, it was an instant success and demand far exceeded production capabilities.

Smith & Wesson® Safety Tip

Always treat every firearm as if it is loaded and will fire if the trigger is pulled.

Do not take anyone's word that the firearm is unloaded – always check for yourself. Never pass your firearm to another person until the cylinder or action is open and you visually check that it is unloaded. Keep your firearm unloaded and safely stored when not in use.

1893

The diesel engine is patented.

1895

X-rays are discovered by German physicist Wilhelm Roentgen.

1896

The .32 Smith & Wesson® Long cartridge is developed and the .32 Hand Ejector, the first swing out cylinder hand ejector model revolver is introduced.

1896

Marconi receives first wireless patent in Britain.

First Modern Olympic Games held in Athens, Greece.

Smith & Wesson® - A Pistol For Every Application

The hardest part about choosing a Smith & Wesson® pistol is choosing just one. With the largest selection available from any manufacturer, Smith & Wesson® has a pistol for every application: concealed carry, personal protection, plinking, competition or law enforcement. Smith & Wesson® pistols are available in compact and full size models with frames of aircraft quality aluminum alloy, stainless steel or polymer. Sight configurations include adjustable, fixed, fixed night sights and now the easy to find HIVIZ®. All popular pistol calibers from .22 Long Rifle to .45 ACP are available.

Whether the .22 Sport Series™, the no frills Value Series™, the full feature TSW Series™, the polymer frame Sigma Series® or the feature loaded SW99 Series™, Smith & Wesson® pistols deliver the innovation, quality, value and reliability shooters have received from Smith & Wesson® for 150 years.

Rimfire Pistols

From the legendary Model 41 to the value packed 22 Sport Series™, Smith & Wesson® rimfire pistols deliver the performance to meet the demands of the competitor and the expectations of the weekend plinker.

Smith & Wesson® Safety Tip

Always be sure of your target and what is beyond it.

Always be sure of where the bullet will strike and shoot only where there is a safe backstop free of obstructions, water or other surfaces which can cause ricochets. Do not fire into the sky.

Chiefs Special®

Compact Smith & Wesson® metal pistols ideal for law enforcement back-up and concealed carry applications.

In 1950 Smith & Wesson® introduced a small frame, 5 shot .38 S&W Special short barrel revolver designed for plain clothes and off duty law enforcement use. It was first shown publicly at the Conference of the International Chiefs of Police that fall and attendees were asked to help name the gun. When the votes were counted the choice was Chiefs Special®.

Nearly 50 years after the original .38 Chiefs Special® 5-shot revolver appeared, Smith & Wesson® introduced three Chiefs Special semi-automatic pistols for law enforcement and personal protection. The new Chiefs Special® pistols, lightweight and compact, are designed for the 21st century.

1920

Harold Wesson becomes president of Smith & Wesson®.

1922

Mussolini marches on Rome.

1923

George Gershwin's *Rhapsody in Blue* is released.

1927

Charles A. Lindbergh flies first successful solo non-stop flight from New York to Paris.

SW99 Series™ Pistols

The result of a collaboration between Smith & Wesson® and famed European firearms manufacturer Carl Walther, interchangeable front sights, three back straps and three trigger modes are among the features of this 21st Century pistol.

Loaded Chamber Indicator

When a round is chambered, a red Loaded Chamber Indicator in the extractor cut of the slide is visible and the pistol is ready to fire.

Cocking Indicator

A red tipped Cocking Indicator, protruding from the rear of the slide indicates when the striker is cocked and the pistol is ready to fire.

Grip

The SW99 has the ability to accommodate a wide variety of hand sizes. The three backstraps, shown at left, come with the SW99 and are easily changed by removing the pin in the lower rear portion of the frame.

Equipment Groove

For mounting a variety of tactical tools including lights and lasers.

Magazine Release

The ambidextrous magazine release is located at the bottom rear of the trigger guard and is activated by downward pressure.

Decocking Button

The SW99 can be decocked from any trigger position by depressing the button on the top left side of the slide.

Model SW99 - 9mm

Smith & Wesson Safety Tip

Always keep your firearm pointed in a safe direction.

Never point a firearm at anyone or anything you do not intend to shoot. This is particularly important when loading, unloading, or field stripping the gun. ALWAYS control the direction of the firearm.

1946

1950

1945

Germany surrenders on May 7.

Mr. C.R. Helstrom named president of Smith & Wesson®, the first person outside the Wesson family to serve in that capacity.

1947

Chuck Yeager becomes the first person to break the sound barrier.

The company moves to a totally new and much larger facility at 2100 Roosevelt Avenue, Springfield, Massachusetts.

Smith & Wesson® introduces the .38 Chiefs Special® - the smallest .38 S&W Special manufactured.

Performance Center® Products For All

The revolvers and pistols of the Smith & Wesson Performance Center® have long been regarded as the best value in high performance handguns. The variety of products made in the Performance Center range from personal protection or concealed carry pistols and revolvers to competition and hunting handguns. Many of these unique products have long been available only from limited distributors. Now, three Smith & Wesson Performance Center® products: the historic Schofield, the competition proven Model 952 and the unique 8 shot Model 627 are available to dealers through all Smith & Wesson® distributors.

1954

Model 39, the first American made 9mm double action pistol is introduced by Smith & Wesson®.

1954

First atomic submarine Nautilus launched.

The High Quality Craftsmanship of the Performance Center®

The Smith & Wesson Performance Center® builds handguns of uncompromising quality and reliability for firearm users with specific expectations and exclusive applications. Performance Center® products are designed from the ground up to produce revolvers and pistols for discriminating handgun purchasers. Extensive analysis of customer needs are combined with old world craftsmanship and space age computer driven technology to produce handguns that meet the requirements of the most demanding firearm enthusiasts in the world.

Smith & Wesson Performance Center® pistols feature hand-fit titanium coated bushings and slide stops for superior accuracy and hand lapped frames and rails for a smooth and tight fit that yields improved durability and accuracy. Revolvers feature counter sunk cylinder charge holes for easy loading and extraction, adjustable weight full underlug barrels and porting to reduce felt recoil as well as integral scope mount slots and interchangeable front sights that allow the shooter to choose their favorite sight system.

1961

Poet Robert Frost recites "The Gift Outright" at John F. Kennedy's inauguration as president of the United States.

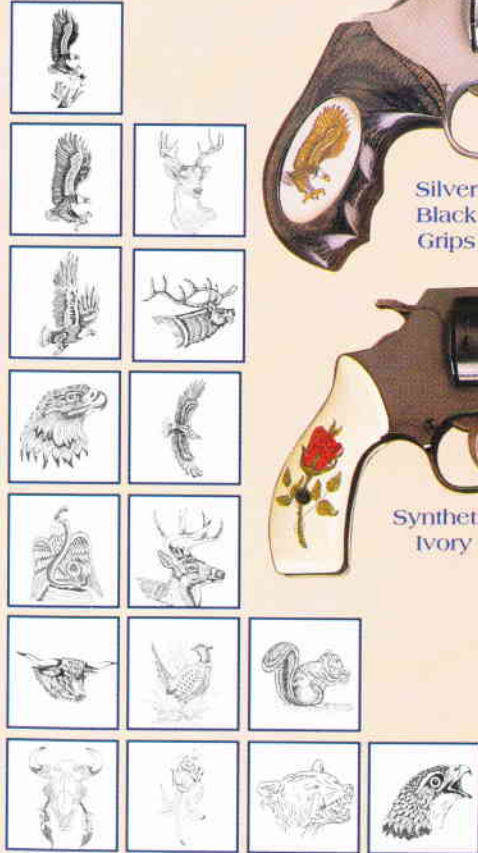

1962

The Beatles appear on *The Ed Sullivan Show*.

Laser Grips

The same high tech process that allows you to personalize your Smith & Wesson® handgun with artwork can now be extended to a set of grips. Choose from a series of specially selected images and a set of unique grips can be prepared for you (for any current, round butt frame revolver only). For more information or to receive a brochure illustrating the artwork available, call 1-800-331-0852.

These designs are available for Laser Engraved Grips.

Laser Engraving

History tells us that man has been personalizing artifacts since the beginning of recorded time. Since the inception of firearms, artisans have inscribed flowing scrollwork, symbols of significance and names and dates of importance on the metal and wood. This practice of adornment and enhancement has created objects of pride as the firearm makes a statement about the owner.

Personalizing your Smith & Wesson® handgun with artwork, names or initials and scrollwork can now be done through the high tech application of laser engraving. Select from a series of animal motifs, lettering and scrollwork that can be laser applied to your handgun and reflect what is important to you. From a name, initials or a date of significance on a pistol slide or revolver barrel to a wildlife image on a hunting revolver or scroll work enhancements on a revolver cylinder and frame, the laser engraving process will produce a handgun unique to you.

LaserSmith™ engraving is quick and affordable. Your gun will be completed with your choice of art and lettering and return shipped within two weeks. The cost of the most extensive coverage will not exceed \$65.00 and depending on your choice of enhancement may be even less. LaserSmith™ enhancements can be done on any stainless or carbon steel component of your Smith & Wesson® handgun. (Small alloy frame revolvers with stainless or carbon steel cylinders cannot be laser engraved.)

Today's technology can enhance your favorite Smith & Wesson® handgun with a selection of artwork designed with you in mind. For more information about laser engraving and to receive a brochure illustrating the artwork available and ordering information, call 1-800-331-0852.

These designs are available as Laser Engraving on Handguns.

1963

Introduction of the .41 Magnum® revolver.

Bill Gunn becomes president of Smith & Wesson®.

1963

President John F. Kennedy is killed in Dallas, Texas.

1965

The sale of Smith & Wesson® by the Wesson family to the Bangor Punta Corporation is completed.

The development of the Model 60, the first all stainless steel revolver, launches the era of the stainless steel handgun.

In addition to providing some of the highest quality products available today, the folks of Smith & Wesson® are committed to providing our customers with support and services second to none. When you purchase a Smith & Wesson® handgun, you receive the Smith & Wesson® Advantage.™

World Class Service

The Smith & Wesson® Advantage™ is comprised of five service features:

1. **Lifetime Service Policy**-We will repair any defect in material or workmanship without charge to the original purchaser for as long as you own the handgun.
2. **Expedited 911 Priority Service** in the event emergency repairs are needed by law enforcement personnel. This service allows you to call upon one of our customer service representatives who will assist you in expediting the prompt repair and return of your handgun.
3. **Discount Coupons for Smith & Wesson® Apparel & Accessories** - Upon receipt of your registration card you will be sent a coupon good for \$25.00 off any purchase of \$50.00 or more from our Apparel & Accessories Catalog (examples on pages 36-37). Redeemable within one (1) year of purchase date.
3. **Easy Access Customer Service**-Our customer service representatives are available to assist your every need.
Internet: www.smith-wesson.com
Telephone: 1-800-331-0852, (USA) 8:00a.m. - 8:00p.m. Eastern Time, Mon-Fri.
Fax: 1-413-747-3317
Postal Mail: Smith & Wesson
2100 Roosevelt Avenue
Springfield, MA 01104
4. **Pride** - Our customer service representatives are proud to represent Smith & Wesson®. They are dedicated to helping customers and look forward to providing you with a level of customer service equal to the level of quality products provided for nearly 150 years. Call us any time, even before you make your purchase. Our customer support team is product knowledgeable and can help you decide which model best suits your needs.

Smith & Wesson® Mountain Bikes

Since its founding in 1852, Smith & Wesson® has dedicated itself to providing high quality products and services. In keeping with this tradition, the Smith & Wesson® Mountain Bike Division began production of a line of law enforcement and public safety bikes in 1997. Smith & Wesson's mountain bikes and bicycle products are built specifically to meet the needs of police and public safety agencies. They include many features intended to add comfort and improve durability for riders who spend hours on a bicycle saddle.

Smith & Wesson's Mountain Bikes are built to carry the weight of both rider and equipment over rough terrain. Features include an elevated rider position, lightweight oversized aluminum frame, heavy duty name brand components, adjustable front suspension, rear rack, rear mounted kickstand, roadworthy tire tread options and comfortable saddle choices. It is no surprise that these bicycles have also found a following among many riders from around the world who recognize the benefits of a bicycle built for hard use.

This year, these same bicycles are available to consumers through select retailers and the convenience of the new shop on-line pages at www.smith-wesson.com. Each model comes with standard features not normally included with consumer bicycles: rear equipment rack, rear mounted kickstand, derailleur guard, water bottles with brackets etc.

Smith & Wesson's ordering and assembly process allows customers to select the correct size and color frame and the appropriate equipment and accessories to outfit each bicycle to suit his or her needs. Using quality brand name components, custom bikes are individually hand-assembled at Smith & Wesson's Springfield, MA factory.

PATROL

- Rugged aluminum frame (black or white)
- SRAM 24 speed grip shifters and rear derailleur
